You Save on Truck Load Orders

No packing charge.

Cheaper transportation rates.

Fast Service — overnight delivery at 400 miles distance.

INDICA AZALEAS

Large Type

The Indicas are especially adapted to landscape planting. Some of the older specimens in southern gardens have attained a spread of 20 to 30 feet over a period of 70 to 100 years with very little care.

We offer a slow field grown plant which is compact, hardy and heavily budded. Most Nurseries report they rarely have enough to take care of the spring blooming rush. Be sure you are not caught short this coming season. Order early!

KURUME — PERICAT — KAEMPFERI and HARDY JAPANESE AZALEAS

This group is comprised of the semi-dwarf varieties, and generally speaking, serve the same purpose in yard planting and pot plants for florist.

Many of these varieties are noted for their heavy blooming qualities, low compact growth and you will find the hardiest of the azaleas in this group.

Azaleas have proven their sales making ability during the spring blooming season. Be sure you have ample azaleas on hand to take advantage of the blooming azalea rush.

Azaleas must be moved before they come into bloom. Be sure to arrange for yours by January or early February for best results. Flowerwood's years of experience and huge stock of these quality plants are available to you at all times.
